AI-first team lead and tech lead. I joined ShiftCare in 2018 as an early engineer and helped grow it from a Sydney startup into an NDIS and aged care software powerhouse, now serving providers in the UK, the US and Canada. I build AI-assisted workflows that keep delivery well-scoped and verified.

8 years Startup to scale-up at ShiftCare | **4 markets** Australia, UK, US and Canada | **4,000+** Commits to the core platform

Experience

ShiftCare / Apr 2023 - Present

AI-first Team Lead & Tech Lead | Sydney, New South Wales, Australia - Hybrid

- Lead planning, code review, and delivery, splitting large features into independently verifiable changes.
- Helped take the platform global, adapting SMS, public holidays, locale, and timezones for new markets.
- Built Recent Releases, an in-app release catalog and beta program, and BECS Direct Debit payments through Stripe and Recurly.
- Introduced AI-assisted engineering: agent-driven CI failure triage, automated migration review, and an agent software factory that turns tickets into reviewed draft PRs.

ShiftCare / Nov 2018 - May 2023

Senior Full Stack Developer | Greater Sydney Area

- Built core NDIS and aged care workflows as an early engineer: scheduling, timesheets, payroll, invoicing, and notifications across Vue.js, Ruby on Rails, and React Native.

Vayu Technology / May 2017 - Oct 2018

Software Engineer

- Built product interfaces in Vue.js and React, with Ruby on Rails APIs and React Native apps.

SmartMobe Solutions Pvt. Ltd. / May 2016 - Apr 2017

Software Engineer | Kathmandu, Nepal

- Developed Laravel backend services for multi-platform integrations, with Angular and Cordova clients.

Pine Software Solutions / Jan 2014 - Apr 2016

Software Engineer / Co-founder | Pokhara, Nepal

- Co-founded a software consultancy and delivered client web and mobile projects with PHP, CodeIgniter, Angular, and Ionic.
